

## Branch / Group Request

The branch / group request form is an area of the system which allows Volunteers to send requests from the system to the Volunteering team at National Office

To find the request form, first go to the menu drop down, and then select Branch Group Request from the options

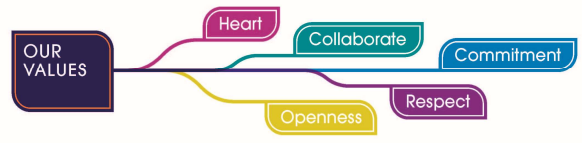

# Branch Group Request

**Subject \***

**Description**

Submit

The form has been kept quite vague, which means it can be used for several different requests as opposed to be restricted to a drop-down menu

An example of the things the request form could be used for is requesting items such as t-shirts or items for branch events, as well as asking for a correction to a volunteering role start date
