

**Please join our
fight against MND**

SIX
people die
from MND
every day
in the UK

Ricardo Andrada, living with MND

Together we make a difference

Our mission

We improve care and support for people with MND, their families and carers.

We fund and promote research that leads to new understanding and treatments, and brings us closer to a cure for MND.

We campaign and raise awareness so the needs of people with MND and everyone who cares for them are recognised and addressed by wider society.

About us

The MND Association was founded in 1979 by a group of volunteers with experience of living with or caring for someone with MND. Since then, we have grown significantly, with an ever-increasing community of volunteers, supporters and staff.

We are the only national charity in England, Wales and Northern Ireland focused on MND care, research and campaigning.

About MND

What we do matters because of the nature of MND:

- MND is a fatal, rapidly progressing disease that affects the brain and spinal cord.
- It attacks the nerves that control movement; people can still think and feel, but their muscles no longer work.
- It can leave people locked in a failing body, unable to move, talk and eventually breathe.
- It affects people from all communities.
- It kills six people every day in the UK, a third within 12 months of diagnosis and more than half within two years.
- It affects up to 5,000 adults in the UK at any one time.
- It has no cure.
