

An introduction to the MND Association Education Strategy

What is it?

The Motor Neurone Disease Association is delivering a new education programme to improve standards of care and quality of life for people living with and affected by MND.

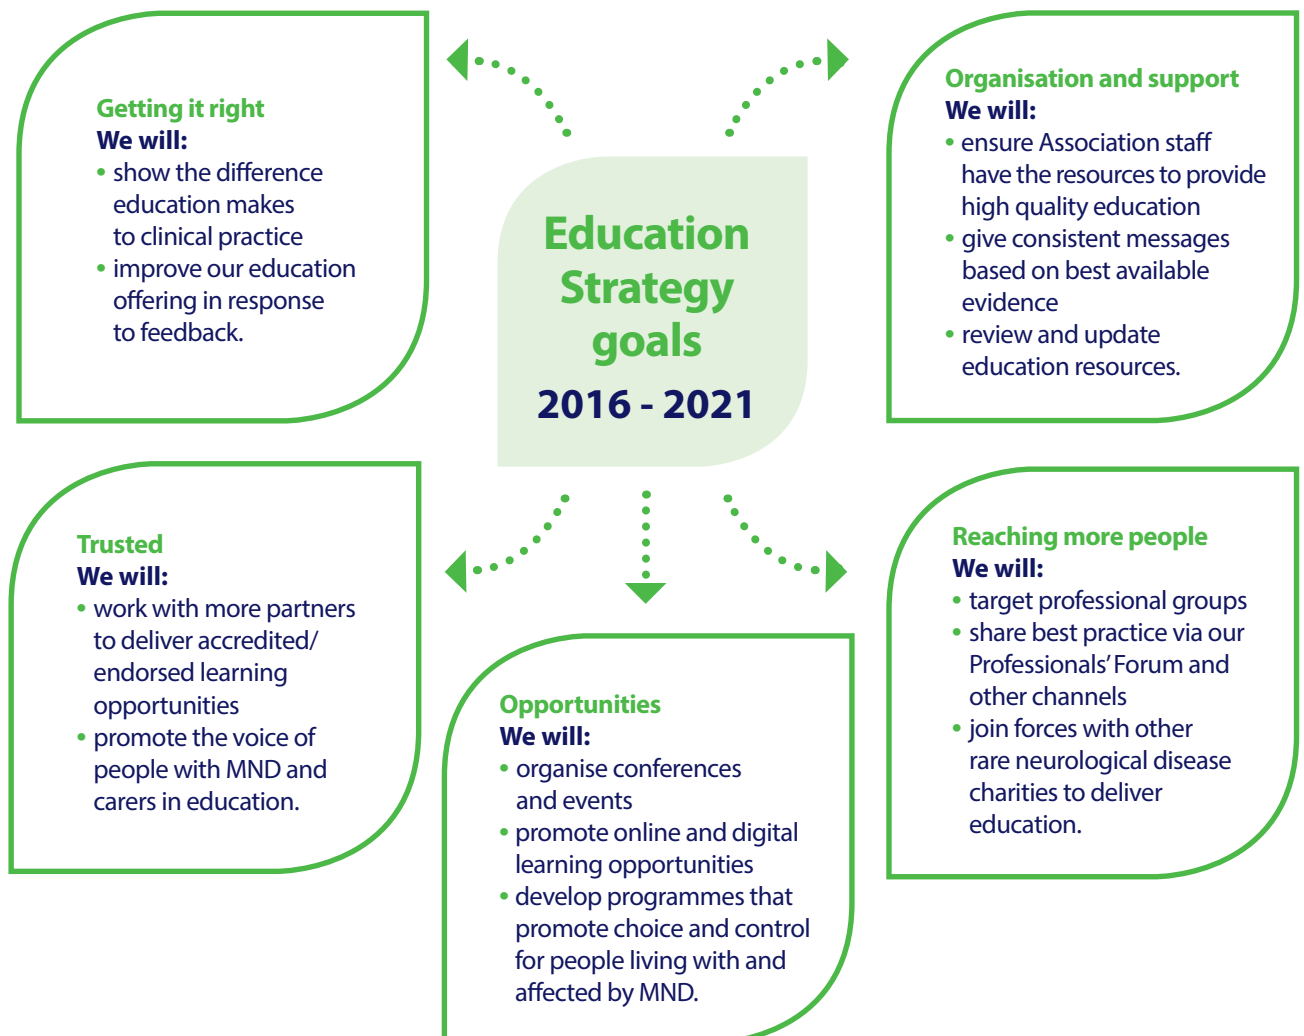

Who is it for?

The programme is aimed at health and social care staff and people living with and affected by MND.

Why?

We want all professionals to have the knowledge and skills necessary to address the needs of people living with MND and their families.

We want people living with and affected by MND to feel empowered to make informed choices and decisions about their care.

For more information about the programme please email education@mndassociation.org
