

Using our care information resources to help you support people with or affected by MND or Kennedy's disease

We understand that effective health and social care information is a vital part of your communication with patients. Our motor neurone disease (MND) and Kennedy's disease resources can help you provide that support. This sheet explains how to find and order our resources, with guidance on what to provide at diagnosis.

Our award-winning care information is evidenced, user tested and reviewed by independent experts, and accredited through the national PIF Tick quality mark. See more at: <https://piftick.org.uk>

Printed publications

Our printed publications are available free of charge in England, Wales and Northern Ireland, for people with or affected by MND or Kennedy's disease. We only charge at cost (plus postage and packing) for use with other conditions. Unfortunately, we are unable to ship hardcopies worldwide, outside of the three countries, except in exceptional circumstances. See next page for order details.

How to order printed publications

We cannot provide bulk or standing orders, so please always order in small quantities at point of need for your patients.

As a charity that works on donations only, this helps avoid unnecessary print runs and wastage after revisions. All outdated versions need to be recycled. Thank you.

To order, contact our Care Admin team by emailing careadmin@mndassociation.org or call the team on 01604 611868 / 611812.

People affected by MND or Kennedy's disease can also order direct, through our MND Connect helpline. Email mndconnect@mndassociation.org or call 0808 802 6262.

Where to start?

Some people want detail at diagnosis – others just an overview. We recommend the following from our wide range, to guide people to the level of content they prefer.

MND

How to find out more – our basic facts leaflet for display in surgeries or clinics.

An introduction to motor neurone disease (MND) – ideal for use at first diagnosis.

Living with motor neurone disease (MND) – for further reading if people want detail.

An easy read guide to motor neurone disease (MND) – for people with reading difficulties.

www.mndassociation.org/about-mnd – our introductory web pages.

www.mndassociation.org/support-and-information – our services and information.

www.mndassociation.org/publications – access to all of our published resources.

Kennedy's disease

2B – Kennedy's disease - our information sheet about this condition.

www.mndassociation.org/kennedys - our web pages for Kennedy's disease.

Carers

Caring and MND: quick guide - to help people adjust if new to a caring role.

Caring and MND: support for you - comprehensive support on carer wellbeing.

www.mndassociation.org/carers – our web pages for carers and family members.

www.mndassociation.org/cyp – our web pages for children, young people and parents.

Animations

www.mndassociation.org/animations – short overviews for both conditions.

Our resources for professionals

In addition to the resources we provide for people with or affected by MND or Kennedy's disease, we offer a range of information and educational opportunities for health and social care professionals:

www.mndassociation.org/professionals - our main hub for professionals

www.mndassociation.org/professionals/publications - all of our publications for professionals

www.mndassociation.org/education - our main education hub, including our events calendar
