Key facts about motor neurone disease (MND)

- MND is a fatal, rapidly progressing disease of the brain and central nervous system. It attacks the nerves that control movement so that muscles no longer work.
- A third of people die within a year and more than half die within two years of diagnosis.
- Around 1 in 300 people will develop MND in their lifetime.
- There is no cure.

The MND Guarantee

If elected as MP for (constituency name), I will champion the needs of constituents living with and affected by MND in Parliament.
