

Sue **The MND Association**

Sue

Initially, I was really impressed. I was then receiving your MND Association magazine and they sent it to me, the first one, in cellophane. And living here, I was trying to keep it a secret and when I wrote to the MND Association and then explained about my situation. They were very apologetic. And since then, it always came in a plain envelope.

So I think maybe, um, it's all about confidentiality. And then I know I was probably being a bit over the top. But, you know, there was a reason why.

But I think they're excellent. And I like to, if I've got this bloomin' illness, I want to try and do anything to help make it better for other people.
